

For gold nugget prospecting in mineralised gold field locations.

**GOLD\***

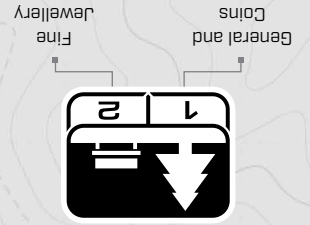

For all salty conditions — dry sand, wet sand, surf and underwater.

**BEACH**

Ideal for detecting in historical fields for the widest range of target sizes.

**FIELD**

Great for high-trash recreational areas, including most general detecting.

**PARK**

# EQUINOX

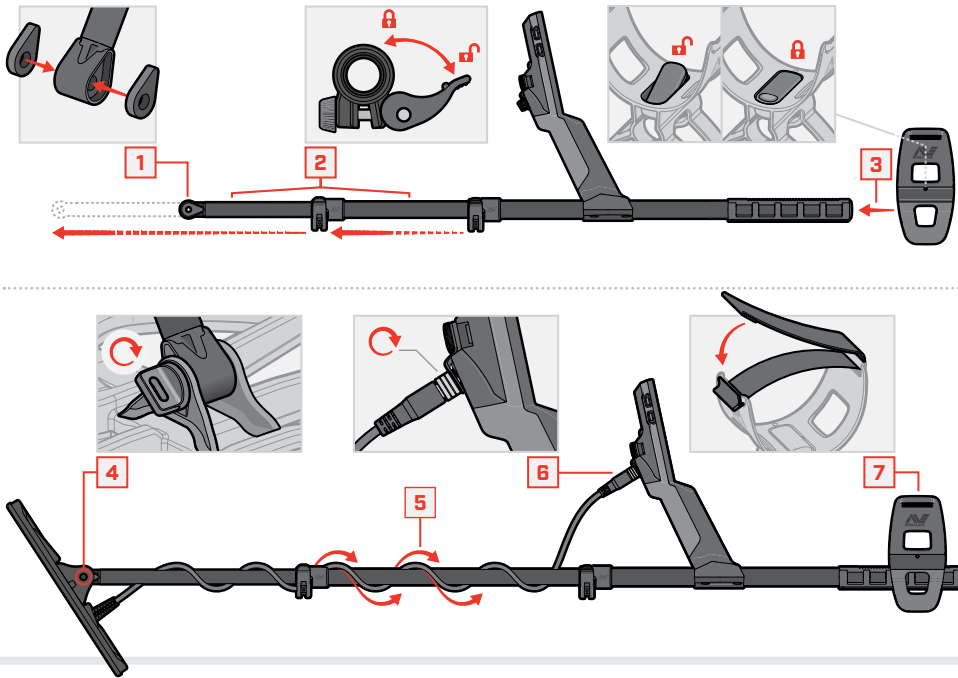

## 700 | 900

**GETTING STARTED GUIDE**

4801-0417-1

## ASSEMBLY

## TIGHTEN CAMLOCKS

Tighten the Camlocks if they slip or become loose.

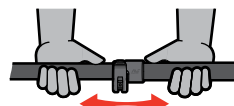

Open

Tighten gently in increments

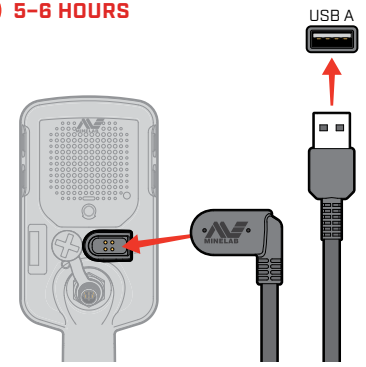

Close

Check and repeat if needed

## CHARGING

5-6 HOURS

**⚠** Charge your detector with a good-quality USB charger that has a minimum charging capacity of 2A @ 5V.

Risk of USB charger failure if a low quality charger is used.

Look for the following marks on USB chargers:

3 HOURS
